

**Mission:** To support the development and expansion of the specialty of allergy/immunology in Israel.

**Vision V1:** A strong clinical and research infrastructure in Israel that is recognized internationally for its contributions to allergy and immunology and attracts the best and the brightest of Israel's physicians.

**Vision V2:** To foster the success of allergy/immunology in Israel, create mentorship opportunities, and inspire collegial relationships internationally.

### **Goals and Principles**

1. **Collaboration and Cooperation:** To encourage international collaboration among allergy/immunology clinicians, educators, and researchers in order to promote the exchange of knowledge and best practices within the allergy/immunology specialty in Israel and around the world.
2. **Education and Training:** To foster excellence in allergy/immunology by providing education and training opportunities for healthcare professionals, creating a supportive environment, particularly for early career allergists/immunologists, to thrive in Israel and internationally.
3. **Research and Innovation:** To support and promote cutting-edge research in the field of allergy/immunology in Israel, encouraging the development of innovative diagnostic and therapeutic solutions that can benefit patients globally.
4. **Mentorship and Networking:** To facilitate mentorship opportunities and networking events for allergists/immunologists in Israel and globally.
5. **Advocacy and Awareness:** To engage in advocacy efforts to raise awareness about the importance of allergy/immunology care and the needs of allergy/immunology patients in Israel and internationally.
6. **Inclusivity and Diversity:** To foster an inclusive and diverse global community of allergists/immunologists, embracing the unique backgrounds and experiences of all members to establish and maintain a dynamic and effective culture.
7. **Ethics and Integrity:** To uphold the highest standards of ethics and integrity in all aspects of allergy/immunology patient care, research, and education, ensuring that the international society fulfills a mission of inspiring our members and serving our patients.
